Implementation of e-Register in the Czech Republic

- two competent authorities:
 - Ministry of Justice
 - Ministry of Foreign Affairs
- other authorities affected – Ministry of the Interior (administrator of „Government
electronisation“)

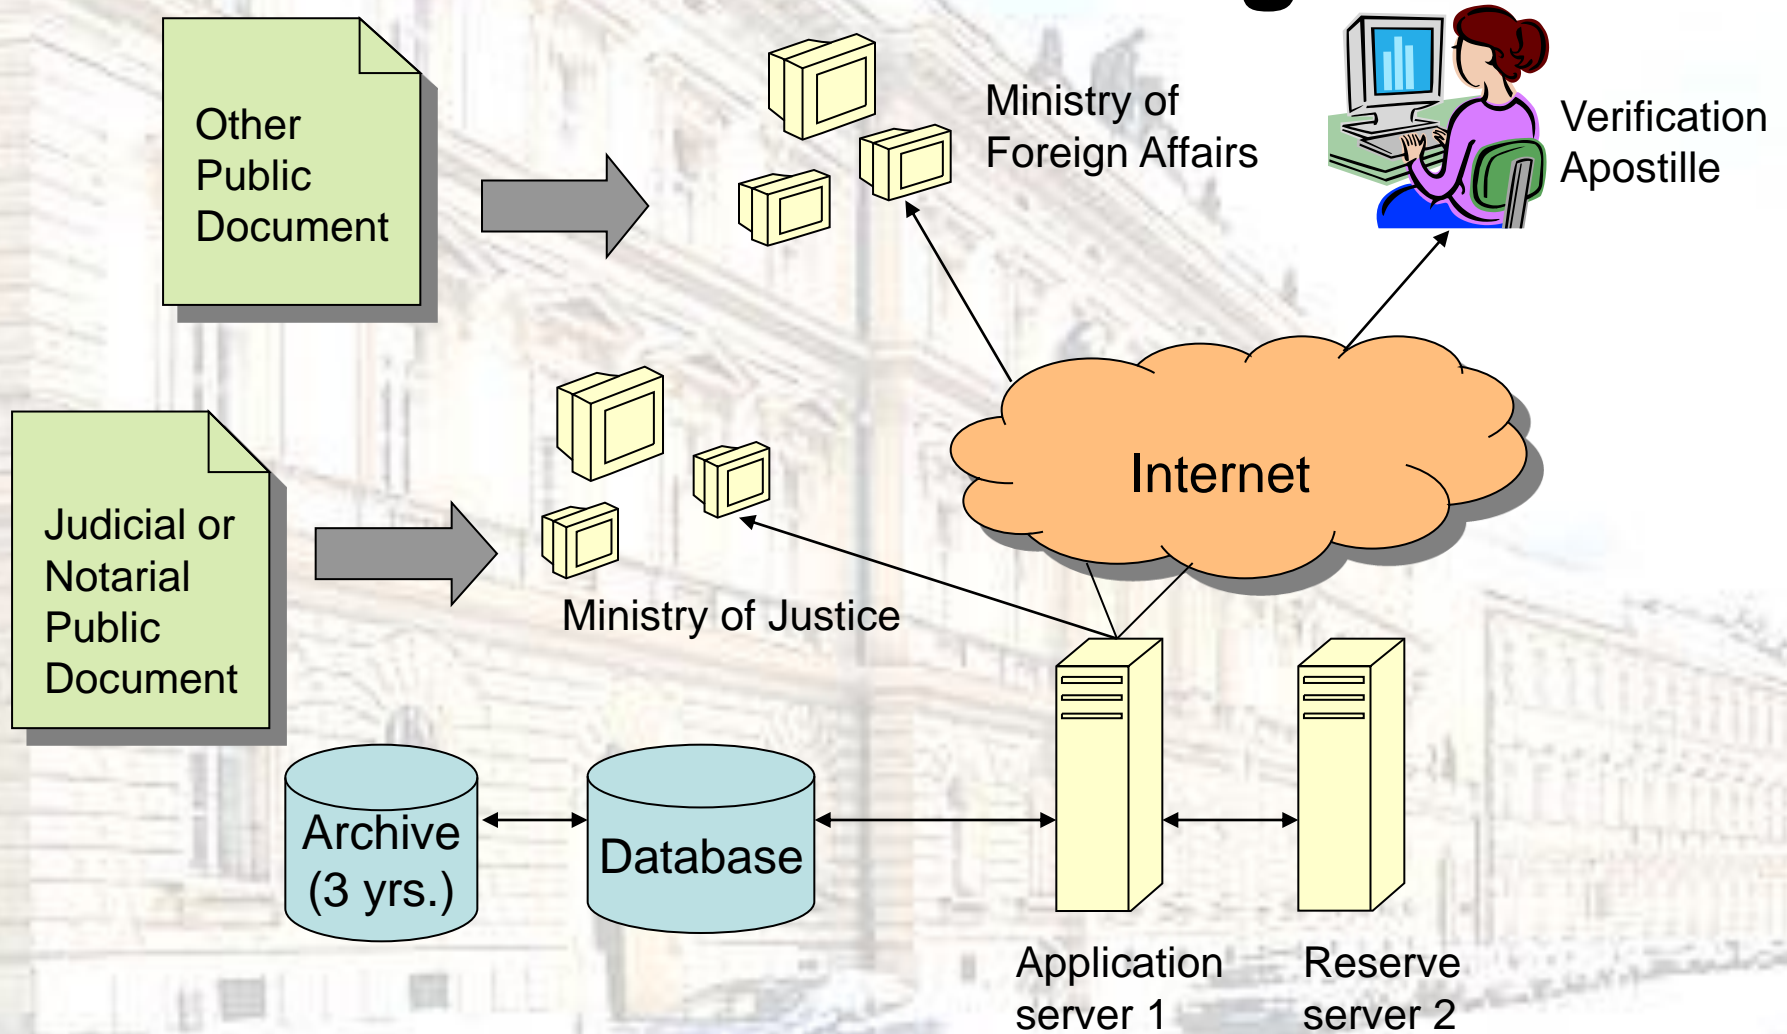

Implementation of e-Register in the Czech Republic

- 2 step-process:
 - 1) enhance trust → **e-Register**
 - 2) Government administration closer to citizens → **e-Apostille**

Project for e-Register in the Czech Republic

- joint project of Czech competent authorities
 one national e-Register
- national e-Register both for registration of issued Apostilles and „common“ legalization certificates
- no new legislation necessary but official Government approval needed
- problems with financing
- possible extension to e-Apostilles component

Scheme of the future Czech national e-Register

Czech national e-Register

- Data to be stored:
 - Serial No. + unique code of Apostille
 - State of use (identified by applicant)
 - Date of issuance of Apostille
 - Authority which certified the document by Apostille
 - Name of person who issued Apostille
 - Type of the underlying document (certified copy, birth certificate, notarial legalisation of signature, etc.)
 - Date of issuance of the underlying document
 - Name + Capacity of person signed on the underlying document + Seal
 - Means of payment (stamp, exemption, possibly electronic means of payment, etc.)
 - possibly when e-Apostille is implemented, hash code of underlying document with Apostille

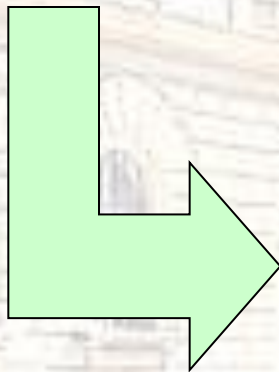

Czech national e-Register

- Data to be accessible to public (upon entering unique code and date of issuance)
 - **Serial No. + unique code of Apostille**
 - State of use (identified by applicant)
 - **Date of issuance of Apostille**
 - **Authority which certified the document by Apostille**
 - **Name of person who issued Apostille**
 - **Type of the underlying document (certified copy, birth certificate, notarial legalisation of signature, etc.)**
 - **Date of issuance of the underlying document**
 - **Name + Capacity of person signed on the underlying document + Seal**
 - Means of payment (stamp, exemption, possibly electronic means of payment, etc.)
 - possibly when e-Apostille is implemented, hash code of underlying document with Apostille

Czech national e-Register Verification by public

- Bears seal/stamp: **JUDr. Aleš Březina, notář v Praze**

Czech national e-Register Special Challenges

- in the future decentralisation for issuance of Apostilles is intended
- Apostillisation of documents issued in digital form (from data boxes, CZECHpoints)

Project for e-Apostilles in the Czech Republic

- 2nd step
- change of legislation necessary → new legislation on legalisation of documents for their use abroad (incl. apostillization) is being prepared
- e-Apostilles only for electronic documents (no scanning)
